Department for  
Business & Trade

is hereby authorised by the Secretary of State to import into the United Kingdom in accordance with the conditions set out below

Commodity Code ex Chapter 93	Country from which consigned Any Country	Country of origin Any Country
---------------------------------	---	----------------------------------

Description of goods  
Firearms, component parts thereof, or ammunition of any applicable commodity code, other than those falling under Section 5 of the Firearms Act 1968 as amended.  
Unlimited

OPEN INDIVIDUAL LICENCE Not valid for goods originating in or consigned from Iran, North Korea, Libya, Syria, Belarus or the Russian Federation (including any previous name by which these territories have been known).  
This licence is only valid if the firearm and its essential component parts (Barrel, frame, receiver (including both upper or lower receiver), slide, cylinder, bolt or breech block) are marked with name of manufacturer or brand, country or place of manufacturer, serial number and the year of manufacture (if not part of the serial number) and model (where feasible). If an essential component is too small to be fully marked it must at least be marked with a serial number or alpha-numeric or digital code. If the item is not marked as set out above you have 1 month from entry into the UK to comply with this requirement. If the item is being imported for deactivation, you have three months to either comply or have the item deactivated.  
Items must be marked using the Latin alphabet and the Arabic numeral system. The font size must be at least 1,6 mm unless the relevant component parts are too small to be marked to this size, in which case a smaller font size may be used.  
For frames or receivers made from a non-metallic material, the marking should be applied to a metal plate that is permanently embedded in the material of the frame or receiver in such a way that the plate cannot be easily or readily removed; and removing the plate would destroy a portion of the frame or receiver. Other techniques for marking such frames or receivers are permitted, provided those techniques ensure an equivalent level of clarity and permanence for the marking.

This licence will cease to be valid for importations after 31st December 2024.

Signed by Test Signatory

Date Issued: 1st June 2020

On behalf of the Secretary of State  
Department for Business and Trade

The issue of this licence does not provide any guarantee that any additional Government permit or approval which may be necessary to effect importation will be granted.

This licence

- is not transferable and may be used only for importations by the holder named above.
- may be revoked at any time without reason given.
- may be altered only by the Department for Business and Trade.
